

## Anti Corruption Policy

An anti corruption policy is a set of measures and strategies implemented by governments, organisations, or institutions to prevent and combat corruption. Corruption refers to the abuse of power for personal gain, often involving bribery, fraud, embezzlement, or other unethical practices. Implementing an effective anti corruption policy is crucial for fostering transparency, accountability, and ethical behaviour within an entity. Here are key components typically found in anti corruption policies:

### Clear Code of Conduct:

Establishing a comprehensive code of conduct that outlines expected behaviour, ethical standards, and consequences for corruption-related activities.

### Training and Awareness:

Providing regular training sessions and awareness programs to educate employees, public officials, or stakeholders about the dangers of corruption, its impact on society, and the importance of ethical conduct.

### Whistleblower Protection:

Creating mechanisms to encourage and protect individuals who report instances of corruption. This may include confidential reporting channels and safeguards against retaliation.

### Transparency and Accountability:

Promoting transparency in financial transactions, decision-making processes, and resource allocation. Holding individuals accountable for their actions through effective monitoring and enforcement mechanisms.

### Conflict of Interest Policies:

Implementing measures to identify and manage potential conflicts of interest that may lead to corrupt practices.

### Auditing and Monitoring:

Conducting regular internal and external audits to detect and prevent corrupt activities. Monitoring financial transactions and other relevant processes helps identify irregularities.

### Legal Framework:

Ensuring that there are robust legal frameworks in place to prosecute and punish those engaged in corrupt practices. This may involve updating and strengthening anti corruption laws.

International Cooperation: Collaborating with international organisations and other countries to share information, best practices,
